

I signed up for the 'block' on unwanted calls because I don't want the following things to happen:

1. The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.
2. How Indiana's Telephone Privacy law has improved my time at home. When I get home from work I like my peace and quiet!!
3. Indiana's law has been very effective because I don't multiple calls like I used to...I would get an average of 4 calls a week. That is very disruptive. My phone line was designed for my use, and not the use of others that want to 'force' me to buy products. If I wanted the product I would have already purchased it or would have gone on line to get it!!!!

Please do not let vendors bug me at home!! That is why we have the internet and shopping malls!!!
